TABLE OF CONTENTS

LAND MOBILE COMMUNICATION

1 - 36

EMR's Land Mobile products include components and systems from 66 MHz to 2.5 GHz with power levels to 1000 watts, covering a wide variety of domestic and international applications. These products include but are not limited to applications in trunking, PCN, PCS, Cellular, SMR, paging, GSM, EGSM, SCADA, Telemetry and Amateur Radio Applications.

200 MHz

36

Much of EMR's 220 MHz equipment can be found in the pertinent categories in the Land Mobile Communications section. Some specialized equipment can also be found on the pages listed to the right.

PCS/PCN

36

Much of EMR's PCS/PCN equipment can be found in the pertinent categories in the Land Mobile Communications section. Some specialized equipment can also be found on the pages listed to the right.

LAND MOBILE

Amplifiers, Receive	29
Antennas & Mounting Kits	34
Bi-Directional Systems & Components	33
Cavity Resonators, Band Pass & Pass Notch	9
Cavity Resonators w/Isolators (Iso-Cavs)	12
Cavity Resonators with Crystal Filters	11
Circulators	1
Combiners, Filter Ferrite	18
Combiners, Hybrid Ferrite	22
Combiner Splitters	32
Crossband Couplers	34
Duplexers, Band Pass	14
Duplexers, Mobile	14
Duplexers, Pass Notch	15
Duplexers, w/Isolators (Iso-plexers)	16
Harmonic Filters	5
Hybrid Couplers & Coupler Panels	32
Intermodulation Control Panels	6
Isolators	1
Line Matchers	5
Load Terminations	5
Low Pass Filters	5
Multicouplers, Receive	24
Multicouplers, Tower Top	27
Multicoupler / Tower Top Options	29
Multicoupler / Tower Top Accessories	30
Power Dividers, Receive	31
Power Supplies	31
Preselectors, (Window Filters)	30
Uni-Directional Systems & Components	33

CIRCULATOR and ISOLATOR APPLICATION NOTES:

- Frequency Band is not a measure of the fixed or tunable bandwidth of the isolator. For details on fixed and tunable bandwidths consult the applicable specification sheets or contact the factory.
- Circulated power is the same as forward handling power.
- To insure stated specifications, loads are dynamically matched to circulators during manufacture. Isolation and insertion loss specifications are guaranteed only with EMR supplied loads.
- Models with load terminations of 125 watts or higher include matched cable to load and circulator to load termination mounting bracket.
- Higher power models are available: please contact the factory with your requirements.
- Connectors other than N female are available: please contact the factory.
- Models with an "H" after the slash (/) include additional heat sinking.
- Models with an "F" after the slash include a thermally activated 115 VAC forced air cooling fan for applications exceeding a 50% duty cycle (1 minute on 1 minute off). Fans using other than 115 VAC are available.
- Isolator models with a "/1S" suffix contain a built-in 2nd harmonic filter.
- Isolators and circulators are manufactured for specific frequencies within the listed frequency ranges. Circulators and isolators are manufactured across the spectrum from 66 MHz to 2.5 GHz for a variety of domestic and international applications. Please contact the factory for more detailed specifications and special requirements.

VHF CIRCULATORS AND ISOLATORS

Model Number	Frequency Band (MHz)	Product Description	Power		Insertion Loss	Isolation	Connectors	Unit Price	
			Input	Refl.					
7340/0	66-88	Circulator, 50 watts	50 W	-	0.50 dB	35+ dB	N Female	640.00	
7340/2	66-88	Single Isolator, 15 watt load	30 W	15 W	0.50 dB	35+ dB	N Female	690.00	
7340/3	66-88	Single Isolator, 30 watt load	50 W	30 W	0.50 dB	35+ dB	N Female	715.00	
7340/4	66-88	Single Isolator, 60 watt load	50 W	50 W	0.50 dB	35+ dB	N Female	745.00	
7350/0H	66-88	Circulator, 100 watts	100 W	-	0.50 dB	35+ dB	N Female	900.00	
7350/4H	66-88	Single Isolator, 60 watt load	100 W	60 W	0.50 dB	35+ dB	N Female	1,005.00	
7350/4AH	66-88	Single Isolator, 75 watt load	100 W	75 W	0.50 dB	35+ dB	N Female	1,020.00	
7350/5H	66-88	Single Isolator, 125 watt load	100 W	100 W	0.50 dB	35+ dB	N Female	1,230.00	
7350/5HF	66-88	Single Isolator, 125 watt load	150 W	125 W	0.50 dB	35+ dB	N Female	1,475.00	
7350/5AHF	66-88	Single Isolator, 150 watt load	150 W	150 W	0.50 dB	35+ dB	N Female	1,545.00	
8340/00	66-88	Circulator, 50 watts	50 W	-	0.75 dB	70+ dB	N Female	970.00	
8340/22	66-88	Dual Isolator, 15/15 watt load	30 W	15 W	0.75 dB	70+ dB	N Female	1,085.00	
8340/23	66-88	Dual Isolator, 15/30 watt load	50 W	30 W	0.75 dB	70+ dB	N Female	1,100.00	
8340/34	66-88	Dual Isolator, 30/60 watt load	50 W	50 W	0.75 dB	70+ dB	N Female	1,145.00	
8350/00H	66-88	Circulator, 100 watts	100 W	-	0.75 dB	70+ dB	N Female	1,380.00	
8350/34H	66-88	Dual Isolator, 30/60 watt load	100 W	60 W	0.75 dB	70+ dB	N Female	1,560.00	
8350/34AH	66-88	Dual Isolator, 30/75 watt load	100 W	75 W	0.75 dB	70+ dB	N Female	1,575.00	
8350/35H	66-88	Dual Isolator, 30/125 watt load	100 W	100 W	0.75 dB	70+ dB	N Female	1,795.00	
8350/45H	66-88	Dual Isolator, 60/125 watt load	100 W	100 W	0.75 dB	70+ dB	N Female	1,825.00	
8350/35HF	66-88	Dual Isolator, 30/125 watt load	150 W	125 W	0.75 dB	70+ dB	N Female	2,035.00	
8350/45HF	66-88	Dual Isolator, 60/125 watt load	150 W	125 W	0.75 dB	70+ dB	N Female	2,065.00	
8350/35AHF	66-88	Dual Isolator, 30/150 watt load	150 W	150 W	0.75 dB	70+ dB	N Female	2,100.00	
8350/45AHF	66-88	Dual Isolator, 60/150 watt load	150 W	150 W	0.75 dB	70+ dB	N Female	2,130.00

*****	1000-2500	PLEASE CONTACT THE FACTORY						

LOAD TERMINATION APPLICATION NOTES:

- 15 through 60 watt units are rated as isolator "screw-on" terminations - derate 30% as stand alone units.
- All load terminations are available with a variety of connectors. Please contact the factory with application details.

LOAD TERMINATIONS

Model Number	Frequency Band (MHz)	Product Description	Power Rating	Connector Type	Unit Price
1605/B	0-1000	RX Multicoupler spare port termination	0.5 W	BNC Male	25.00
1605/N	0-1000	RX Multicoupler spare port termination	0.5 W	N Male	25.00
1620	0-1000	Isolator "screw-on" termination	15 W	N Male	55.00
1630	0-1000	Isolator "screw-on" termination	30 W	N Male	75.00
1640	0-1000	Isolator "screw-on" termination	60 W	N Male	105.00
1640A	0-1000	Isolator "screw-on" termination	75 W	N Male	125.00
1640B	0-1000	Isolator "screw-on" termination	100 W	N Male	135.00
1650	0-1000	Isolator and Combiner termination	125 W	N Female	245.00
1650A	0-1000	Isolator and Combiner termination	150 W	N Female	310.00
1660	0-1000	Isolator and Combiner termination	250 W	N Female	410.00
1670	0-1000	Isolator and Combiner termination	300 W	N Female	985.00

APPLICATION NOTES FOR LINE MATCHERS, 2nd HARMONIC FILTERS AND LOW PASS FILTERS:

- Line matchers provide a means to correct impedance matches between elements of a system.

LINE MATCHERS / 2ND HARMONIC FILTERS / LOW PASS FILTERS

Model Number	Frequency Band (MHz)	Product Description	Input Power	Insertion Loss	Connectors		Unit Price
					Input	Output	
4350/L	66-108	Low Pass Filter	150 W	0.25 dB	N Male	N Female	245.00
6350/S	66-108	2nd Harmonic Filter	150 W	0.15 dB	N Male	N Female	140.00
6350/Z	66-108	Line or Impedance Matcher	150 W	0.15 dB	N Male	N Female	140.00

6450/Z	108-300	Line or Impedance matcher	250 W	0.15 dB	N Male	N Female	135.00
4550/L	300-650	Low Pass Filter	250 W	0.25 dB	N Male	N Female	230.00
6550/S	300-650	2nd Harmonic Filter	250 W	0.15 dB	N Male	N Female	135.00
6550/Z	300-650	Line or Impedance Matcher	250 W	0.15 dB	N Male	N Female	135.00
4650/L	650-1000	Low Pass Filter	150 W	0.25 dB	N Male	N Female	230.00
6650/S	650-1000	2nd Harmonic Filter	150 W	0.15 dB	N Male	N Female	130.00
6650/Z	650-1000	Line or Impedance Matcher	150 W	0.15 dB	N Male	N Female	135.00

INTERMODULATION CONTROL PANEL NOTES:

- I.M. control panels include factory tuned isolator, harmonic filter and 19" rack mount panel.
- Frequency Band is not a measure of the fixed or tunable bandwidth of the I.M. panel. For details on fixed and tunable bandwidths consult the applicable specification sheets or contact the factory.
- Models with load terminations of 125 watts or higher include matched cable to load and circulator to load termination mounting bracket.
- To insure stated specifications loads are dynamically matched to circulators during manufacture. Isolation specifications are guaranteed only with manufacturer supplied loads.
- Higher power models are available; please contact the factory.
- Models with an "H" after the slash (/) include additional heat sinking.
- Models with an "F" after the slash include a thermally activated 115 VAC forced air cooling for applications above 200 watts and exceeding a duty cycle of 50% (1 minute on and 1 minute off). Fans using other than 115 VAC are available.
- Low pass filters may be provided in place of 2nd harmonic filters for an additional charge.

CAVITY RESONATOR APPLICATION NOTES:

- Specify operating frequency and coupling factor with order.
- Single cavity models do not include 19" rack mounting equipment.
- Models with an "H" after the slash (/) include additional heat sinking.
- Models with an "F" after the slash include a thermally activated 115 VAC forced air cooling fan for continuous duty applications. Fans using other than 115 VAC are available; please contact the factory concerning your application.
- Band pass cavities have adjustable coupling loops. Contact the factory for specific loss coupling ranges.
- Power ratings listed are based on 1 dB insertion loss setting in the cavity resonator.
- Connectors, other than those listed, are available upon request; please contact the factory with your requirements.
- Band pass cavity input power ratings are for nominal 1 dB loop coupling factor. Contact the factory for loop settings at higher and lower input powers.
- Cavity height dimensions do not include resonant rod height which in frequency dependent.
- Cavity resonators are available throughout the spectrum from 66 MHz to 2.5 GHz.

“CRYSTAL CAVITY” APPLICATION NOTES:

- Please refer to Cavity Resonator Application Notes on page 9.
- Specify frequency and coupling factor for band pass cavities used with crystal filters. Overall insertion loss specifications below are based on nominal 1 dB coupling loss through the band pass cavity resonator.
- “Crystal Cavity” prices are based on a “LIST-PLUS-NET”. The crystal filter price is a fixed net price of \$625.00 (subject to change without notification). Exact operating frequency must be specified for front-end crystal filters. Crystal filters cannot be returned to the factory for any reason other than warranty repair.

ISO-CAV APPLICATION NOTES:

- Specify exact transmit frequency and transmitter power level when ordering.
- Noise rejection and insertion loss are directly related and are adjusted through cavity coupling loops (0.5-2.0 dB per cavity). The higher the insertion loss the greater the noise rejection will be; lower insertion loss translates to less noise rejection.
- Please refer to all application notes concerning Isolators on page 1 and Cavity Resonators on page 9.
- All Iso-Cavs have N Female input and output connectors. Contact the factory for other connector types.
- Contact the factory for recommendations regarding equipment selection as well as available options which are not listed.

DUPLEXER APPLICATION NOTES;

- Specify transmit and receive frequencies and transmit power levels when ordering.
- In both Band pass and Pass notch style duplexers greater isolation can be achieved at higher insertion losses.
- Standard mobile duplexer connectors are BNC female. Standard base station duplexer connectors are type N female.
- Contact the factory for duplexers with different channel spacings, loss settings, power levels and isolation performance.

ISO-PLEXER (ISOLATOR-DUPLEXER) APPLICATION NOTES:

- Iso-plexers include a duplexer, an isolator, a 2nd harmonic filter and applicable mounting hardware. A low pass filter may be substituted for the 2nd harmonic filter for an additional charge of \$140.00.
- Please refer to all Isolator application notes on page 1 and Duplexer application notes on page 14.
- Isolators below 155 MHz in frequency may require offset tuning; dependent on transmit power, duty cycle and operating environment.

FILTER - FERRITE TRANSMITTER COMBINER APPLICATION NOTES:

- Please refer to application notes concerning Isolators on page 1 and Cavity Resonators on page 9.
- Standard transmitter combiner input connectors are type N female. Contact the factory for available connector options.
- If combined output power exceeds 400 watts, 7/16 DIN connectors are recommended.
- Combiner insertion losses and TX-TX isolation vary according to spacing between transmit channels.
- Contact the factory for transmitter combiners with frequency bands, power levels, channel spacing or number of channels which are not listed in this brochure.
- Larger cavities are available for tighter channel spacing and higher transmit power; please contact the factory.
- Successful combiner expansion is dependent on existing and future frequencies, input powers, combiner physical format and many other factors. Please contact the factory for assistance with present and future antenna system design and engineering needs.
- In many instances field expansion of complex combining systems is impractical or impossible. Often, factory optimization of expanded combiners is desirable. Contact the factory for availability of "loaner" units and quick turnaround for "in-factory" combiner expansion, refurbishment, repair and optimization.

FILTER - FERRITE TRANSMITTER COMBINER APPLICATION NOTES:

- Please refer to all Isolator (page 1), Cavity Resonators (page 9) and Filter - Ferrite transmitter combiner application notes (page 18).
- UHF Filter - Ferrite transmitter combiners from 300-650 are separated into 5 separate frequency groupings not shown below: A (300-375 MHz), B (375-440 MHz), C (440-512 MHz), D (512-580 MHz) and E (580-650 MHz). These frequency designators are to be included after the "7" in the model number (i.e. 65311/7C for a combiner with transmit frequencies between 440-512 MHz).

HYBRID - FERRITE TRANSMITTER COMBINER APPLICATION NOTES:

- Please refer to all Isolator notes on page 1.
- Hybrid combiners below 155 MHz may require offset tuning of the isolators dependent on the transmit power levels, exact operating frequency, duty cycle and operating environment.
- Hybrid combiners with ferrite isolators also include 2nd harmonic filters. Models with more than 2 channels include all cabling internal to the Hybrid Combiner.
- Hybrid combiners rated at 250 watts require forced air cooling fans (models with an "F") for operations exceeding 50% duty cycle (1 minute on and 1 minute off).
- Standard hybrid combiners have type N Female connectors on all ports. BNC Female connectors are available for applications below 50 watts: please contact the factory.
- Transmitter - to - transmitter isolations given below are minimum when hybrid(s) are matched to the antenna system per instructions provided.
- Hybrid combiners are available from 2 to 16 channels and higher power levels than those listed; please contact the factory.
- Hybrid combiners can be equipped with band pass and/or pass notch cavity resonators for transmitter wide band noise suppression.

RECEIVER MULTICOUPLERS APPLICATION NOTES:

- Multicouplers are supplied complete, pretuned and ready for installation. Standard components include preselector, adjustable gain amplifier, receiver signal power divider(s), 115 VAC power supply, chassis mounting tray, 19" relay rack panel, wiring, hardware and jumper cables as requires. Multicoupler components can be purchased separately.
- Multicouplers, with up to 8 ports, are mounted on a 5.25" x 19" x 10" relay rack panel and chassis. Multicouplers with greater than 8 ports require additional relay rack panels. Contact the factory for available connector options.
- Standard antenna input connectors are Type N Female. Contact the factory for available connector options.
- Multicoupler options include include 240 VAC, 12, 24 & 48 VDC power supplies, specialized preselectors.
- Multicoupler options and accessories can be found on pages 30-32.

TOWER TOP RECEIVER MULTICOUPLER APPLICATION NOTES:

- Tower top multicouplers are supplied complete - pretuned and ready for installation.
- Standard tower mounted components include preselector, adjustable gain amplifier, DC pick-off with lightening protection and a weather resistant aluminum NEMA enclosure with N Female input/output connectors and 2" saddle mast mounting brackets.
- Standard multicoupler components include 115 VAC 1/2 amp power supply, DC injector, power divider(s), chassis mounting tray, relay rack panel, wiring, hardware and jumper cables as required.
- Multicoupler Master Divider Panels with up to 8 ports are supplied on a 3.5" x 19" x 10" relay rack panel and chassis as standard. One rack unit (1.75" x 19" x 10") panel chassis are available. Multicouplers with greater than 8 ports require additional relay rack panels. Contact the factory for multiple channel receiver power divider mounting options.
- Standard antenna input connectors are type N Female. Contact the factory for available connector options.
- Multicoupler options include 240 VAC and 12, 24 & 48 VDC power supplies, specialized preselectors. Multicoupler accessories can be found on page 29, 30 and 31.

MULTICOUPLER OPTION APPLICATION NOTES:

- Tower Top Multicoupler and standard multicoupler options require changes or addendum's to the model numbers as shown below. Example: Model 96018-1/P-5CH (standard 8 port SMR Tower Top Multicoupler) with the addition of lightening protection becomes 96108-1/P-5CH(S)

TOWER TOP AND RECEIVER MULTICOUPLER AVAILABLE OPTIONS

Modification to Model Number	Description	Add'l Cost to Multicoupler
Change P-5 to P-6	6 Section Preselector (406-960 MHz Only)	105.00
Add (O2)	230 VAC Primary Voltage Source	65.00
Add (O3)	12 VDC Regulator 1/2 amp assembly	65.00
Add (I1)	115 VAC Primary Voltage Source, 1 amp DC output current	315.00
Add (S)	Lightening Protection (Tower Top only, includes 1 Lightning Protector)	265.00
Add (ATS)	Pin diode attenuator, separate from amplifier (variable attenuator)	305.00
Add (ST)	Change a Tower Top Nema enclosure from aluminum to stainless steel	NET 905.00

AMPLIFIER APPLICATION NOTES:

- Standard models come equipped with BNC Female connectors on input and output. Other connectors are available; please contact the factory with your requirements.

Model Number	204316/2A					\$ 590.00
Frequency Band (MHz)	40 - 512					
Pin Diode	Yes

PRESELECTOR APPLICATION NOTES:

- Other connectors are available; please contact the factory concerning your application.
- Both pass band receive preselectors and cavity resonator preselectors have applications in low power broad band transmit applications; please contact the factory concerning your requirements.

ORDERING INFORMATION - TERMS AND CONDITIONS OF SALE - STANDARD WARRANTY POLICY

ORDER PLACEMENTS: All prices shown are list price, FOB factory (Phoenix, Arizona - USA) and are subject to change without prior notice. Prices include domestic packaging and are exclusive of federal, state or local excise or sales taxes, duty or brokerage charges on export shipments. Unless otherwise negotiated freight will be prepaid and added to the invoice.

Operating frequencies and power levels used in preparing EMR products are those provided by the customer. Errors in operating frequencies or power levels made by EMR will be corrected at no charge. Errors due to faulty information from the customer are subject to all shipping charges and any material and/or labor costs incurred by EMR Corporation to correct the order.

TERMS OF SALE: Terms of sale are C.O.D., or Cash With Order unless other terms have been established prior to shipment. Open account status will be extended upon reasonable assurance of credit worthiness. Past due accounts are subject to a late charge of up to 2% monthly, beginning 30 days after the date of issuance of our valid invoice.

ORDER ACCEPTANCE: An order is considered contractually valid when accepted by telephone, purchase order, telegram or facsimile. Cancellations made less than 15 days prior to scheduled ship date may be subject to a cancellation charge.

CLAIMS FOR SHIPPING LOSS OR DAMAGE: All shipments will be made via mode of transportation specified by the customer. If coded "best way" shipment will be consigned to the most economical, reliable commercial carrier. Insurance will be taken unless the customer specifically takes responsibility for shipping loss or damage. Although claims for loss are the responsibility of the consignee, EMR will assist in all ways in making claims and tracing for loss or damage to any of its shipments.

MODIFICATIONS AND DELAYS: EMR reserves the right to make design changes or modifications to any of its products without specific prior modification provided that such modifications do not materially reduce the value or performance of the equipment concerned. EMR will not be responsible for delays in shipments occasioned by slow or interrupted deliveries to EMR of components, materials or processes necessary to the completion of any project as originally scheduled.

PRODUCT RETURNS: Merchandise returned without having first obtained written acknowledgement from EMR may be rejected. Unless otherwise authorized, credits or refunds will not exceed 90% of originally invoiced amounts, and in no event shall include transportation costs. Return authorizations shall expire in 60 days unless otherwise specifically noted.

MECHANICAL SEALS: EMR provides mechanical seals on many of its products. These seals insure the the unit has not been modified or tampered with once it has left the factory. "Breaking" these seals without consent from an authorized EMR Corporation engineer or technician may invalidate the warranty policy stated below.

STANDARD WARRANTY POLICY: EMR Corporation, hereinafter called EMR, warrants that all equipment of its manufacture shall be free from defects in design, materials and workmanship for a period of 12 months from date of shipment unless otherwise covered by special warranty. If any such product, entirely or in part, fails to produce the performance as set forth in the brochure, quotations or literature provided by EMR, such product will be replaced or repaired at EMR's expense provided that the failure was not the result of alteration, misuse, tampering, misapplication, shipping damage or vandalism. If a product failure is found to be the fault of EMR, costs of transportation to the EMR factory and return will be born of EMR. A reasonable charge for travel and subsistence costs will be invoiced when on-site repairs are necessary. Should EMR supply components not of its own manufacture, but specified by a customer, the warranty shall reflect the original manufacturer's warranty, only.

It is understood that this statement constitutes EMR's entire and only warranty, there being no other warranties expressed or implied in law or in fact, including implied warranties of fitness. In no event shall EMR be liable for damages, either direct or consequential, that may be occasioned by any defect in material, workmanship or product support.

EMR Manufactures
HIGH QUALITY R.F. FILTERING EQUIPMENT:
AMPLIFIERS
ANTENNA DUPLEXERS
BI-DIRECTIONAL ENHANCEMENT SYSTEMS
CAVITY RESONATORS
CIRCULATORS
CROSSBAND COUPLERS
FILTER-FERRITE TRANSMITTER COMBINERS
HARMONIC FILTERS
HYBRID-FERRITE TRANSMITTER COMBINERS
INTERMODULATION CONTROL PANELS
ISOLATORS
ISO-CAVS
ISO-PLEXERS
LINE MATCHERS
LOAD TERMINATIONS
LOW PASS FILTERS
RECEIVER MULTICOUPLERS
TOWER TOP RECEIVE MULTICOUPLERS

EMR will help you with:
PRACTICAL ANTENNA SITE ENGINEERING
INTERMODULATION CONTROL
I.M. CALCULATION STUDIES
MASTER ANTENNA SITE PLANNING
ANTENNA SITE MAINTENANCE
INTERFERENCE PROBLEM TROUBLE SHOOTING
SYSTEM INSTALLATION
SYSTEM OPTIMIZATION
INFORMATIVE TECHNICAL LITERATURE

EMR will also provide:
ANTENNA SITE CONSULTING SERVICES
ON-SITE SERVICES
SYSTEM INSTALLATION
SYSTEM OPTIMIZATION
SYSTEM QUALIFICATION
FIELD EXPANSION
SYSTEM TROUBLE SHOOTING
